

BISC 204, Lab 6B

Lab 6B Objectives:

1. Exchange introduction (& methods, if you have them) sections with your peer feedback partner. Use the peer feedback form to give thorough feedback on the other person in your pair's draft. Submit your feedback via Sakai.
2. Meet with Prof. Matthes 1-on-1 to discuss your model code development and any roadblocks. Use your peer to also help to think through any issues in your code.
3. Develop your model within R, and get it working before you leave lab section.
